

Testing

Language testing should be as unique as the individuals being evaluated. While testing for assessment and validation of student proficiency is an integral and in-built feature of MiLanguages' language training courses, customized testing can be designed for your staff members who have studied elsewhere or job applicants who indicate fluency in one or more languages. Testing also

can be tailored to specific departmental or agency needs such as human resources or law enforcement and may include spoken and/or written components if required.

Translation

An established track record for fast turn-around on even the largest technical manuals and materials means MiLanguages is your one-stop resource for translation jobs of all sizes, topics, and languages. Our wide network of professional translators using modern online collaboration tools provides certified translation services for documents and materials in various categories such as academic, health care, legal, personal, and military. Turn to MiLanguages for efficient and accurate translations of anything from 2,000 to 2 million words or more.
